

## About the Medium - Michael Withington

I have been a member of the Victorian Spiritualists Union since February 1977. At this time I joined a psychic development class with a primary interest in healing.

The nature of unfolding experiences found me passing through four different circles over a total of fourteen years. During this time I was greatly assisted by teachers from both sides of life and eventually I was given an opportunity to contribute to a movement through which I had received so much help.

It has been both a privilege and a pleasure to have received invitations to public work in a number of Spiritualist centres in Melbourne and around Victoria over the last twenty eight years.

The thoughts expressed in these presentations are drawn from my own limited understanding which is then greatly complemented with the guidance, inspiration and word selection from a team of guides functioning under the direction of the guardian spirit.

To this day I still feel a sense of disbelief that this team of beautiful beings have seen fit to allow my involvement in their work. Their teachings are intended to share an understanding of natural law to complement the life of travellers through this world. It is an ancient philosophy returning in todays use of language for an easier understanding.

Accept only that which you find in accordance with your own personal experiences and if the mind can be left open then the consciousness will continue to expand.

May the love of the Great One be with you now and forever.
